

ShopEZ - Comprehensive Empathy Map

Overview

The empathy map helps understand the behavior, emotions, and expectations of users interacting with ShopEZ. Understanding customer needs is essential for creating a successful and user-friendly online shopping platform.

What Customers Say

Customers say they want genuine products, secure payments, affordable prices, and fast delivery services. They expect a platform that is easy to use and provides reliable customer support.

What Customers Think

Customers think about product quality, delivery reliability, and payment security before making purchases. Many users compare products and reviews before selecting items. Customers also expect return and refund policies to be transparent.

What Customers Do

Customers search products, compare prices, add items to wishlists, place orders, and track shipments. Many users spend time reading customer reviews and ratings before making decisions.

What Customers Feel

Customers feel excited when they find discounts and special offers. They feel satisfied when products arrive on time and match expectations. However, they become frustrated when deliveries are delayed or products are damaged.

Seller Perspective

Sellers expect tools for product uploads, inventory management, sales analytics, and order tracking. They want better visibility into customer preferences and purchasing behavior.

Importance of the Empathy Map

By understanding customer emotions and seller needs, ShopEZ can improve user experience, customer satisfaction, and platform efficiency. The empathy map supports better design decisions and feature development.
